

## The B9Creator 3D DLP Printer v1.2 Build Spaces

B9Creator's HD projector moves vertically, resizing the image at the print surface:

- Highest position gives higher xy resolution (30µm pixels);
- Lowest position gives less xy resolution (70µm pixels).

Z axis is limited by the length of the table positioning rod, and is 200mm in all cases.

v1.2 BUILD SPACE  
57.6mm x 32.4mm x 200mm  
at 30µm x-y

v1.2 BUILD SPACE  
96.0mm x 54.0mm x 200mm  
at 50µm x-y

v1.2 BUILD SPACE  
104.0mm x 75.6mm x 200mm  
at 70µm x-y
